

To Whom It May Concern:

Submittal: HYDROTRIM™ Water-Activated, Self-Adhesive Drywall Corner Trims

Description: HYDROTRIM™ Water-Activated, Self-Adhesive Drywall Corner Trims are made with a high quality latex saturated paperboard laminated to a proprietary copolymer plastic and self-adhesive paper joint tape.

The high quality paperboard ensures that joint treatment, paints and wallpapers have prefinished surfaces for maximum adhesion of all finish materials.

No nailing is required with these profiles, making installation and precision corner alignment easier while eliminating nail pops and edge cracking.

Benefits are:

- Fast, easy application to reduce labor costs
- Crack resistance to eliminate the need for costly callbacks
- Paper cover ensuring smooth, more aesthetic corners
- Reduction in joint treatment usage

Storage: Store in dry place protected from moisture
 Do not store below 32 degrees Fahrenheit

Certification: HYDROTRIM™ Water-Activated, Self-Adhesive Drywall Corner Trims meet or exceed ASTM C1047, ASTM C475. (AMERICAN SOCIETY FOR TESTING AND MATERIALS). These specifications cover accessories used in conjunction with assemblies of gypsum wallboard and gypsum veneer plaster to protect edges and corners and to provide architectural features.
